

“Stories of the Afterlife”...your Life Between Lives

In recent years there has been a surge of interest emerging in regard to our existence beyond this body.

The eternal questions of “What really happens when we die?”, “Where do we go to?”, and “Why did I come here in the first place?”, have been permeating our awareness for too many generations to count.

Recent best sellers by Anita Moorjani; *Dying To Be Me* (Hay House, 2012) and Eben Alexander; *Proof of Heaven* (Pan McMillan, 2012) have documented stunning stories of surviving their respective near death experiences (NDEs), and returning to inspire others about the afterlife.

Interest in “reincarnation” has never been higher, in fact even as far back as 2001, a Morgan Gallup poll in the USA showed 45% of respondents either believed in past lives or were open to it. Past Life Regression offered by a well-qualified professional is also becoming more common in the resolution of trauma.

New articles about scientific research and experimentation about consciousness surviving beyond death, abound. What was once seen as fantasy, can now be the focus of a PhD.

There is a field of work that has remained somewhat hidden from the public eye, though is in the process of emerging further into the light of awareness. It not only answers the questions stated above, but transcends Past Life Regression, taking clients into the expanded state outside the body, without the complexities, trauma on family and friends and the medical expenses of an NDE!

In 1968 in Los Angeles California, Dr. Michael Newton made a startling discovery during a therapeutic session when addressing a women’s battle with depression. As he moved to the source of her distress under deep Hypnosis, he reunited his client with her soul family in her existence between incarnations. The field of “Life Between Lives Hypnotherapy” was born.

Over the next 35 years and 7000 clients, Dr. Newton made incredible discoveries as he patiently and meticulously mapped the Spiritual Realm. He helped clients to discover the deep connection of unconditional love offered by our spiritual guides who help us through our lifetimes. He reconnected clients with their soul group, with whom we reincarnate regularly as we learn and grow together. Clients were able to meet with their “Council”, an advanced group of beings who help us debrief our last lifetime and plan the next, including the one we are in right now. Ultimately he has shown through his life’s work that we are all spiritual beings, having a human experience. When we know life from that perspective we are forever changed.

His best selling books that document his findings and the stories of his clients, *Journey of Souls* (Llewellyn Publishing 1994) and *Destiny of Souls* (Llewellyn Publishing 2001) have changed the lives of many thousands and have been translated into forty different languages.

These deep and profound life changing sessions are roughly 4 hours duration and preparation is key.

When Dr. Newton retired, he placed his legacy to humanity in the hands of a group of highly trained professionals and founded The Newton Institute for Life Between Lives (LBL) Hypnotherapy. In 2009, *Memories of the Afterlife* was launched as a collective work from The Institute showcasing new stories from a global network of LBL Therapists, assembled by Dr. Newton himself.

The life purpose of one man has now spread to many, who are now the custodians of his legacy to humanity. The Newton Institute has over 200 LBL Therapists now, offering these profound experiences across 39 countries. Whilst many draw on his work these days, this highly trained group are the only ones who carry his unique endorsement, earned through specific training, robust certification and a spiritual code of ethics.

The first 7000 cases have now grown to a number over 30,000 as more people are inspired to rediscover their immortal identity to bring wisdom and inspiration to this lifetime.

In 2015, after huge public demand, The Newton Institute launched our quarterly research journal “**Stories of the Afterlife**”, sharing the most recent cases from around the world and the latest updates in this rapidly growing field of consciousness work.

If you are seeking an understanding of your immortal identity, visit www.newtoninstitute.org. There you will discover more about our remarkable organization, a listing of TNI Certified LBL Therapists across 39 countries and a chance to subscribe to our *Stories of the Afterlife* quarterly research journal.

Profile:

Peter Smith has been President of The Newton Institute since 2009. He travels regularly to speak about the work of Dr. Michael Newton and The Newton Institute and trains LBL Therapists in different parts of the world.

He is based in Australia and can be contacted at president@newtoninstitute.org
