"I recommend this experience to anyone whose inner voice is guiding them towards self-development" – Sergey

"I found this experience so gentle yet so powerful - Irina

"We were held in a beautiful, safe nurturing space to learn, experience and grow on our spiritual path" - Barb

We will talk about Resonance, Frequency and Vibration. We discuss Transcendence as a way to move into a new state of being. Our "Living In Resonance" model becomes our path across the weekend as we look at everything from human personality and values to the multidimensional, spiritual and transcendent aspects of your being.

We ask that you undertake two on-line assessments before the weekend that give you a summary of both your personality profile and personal values. These windows through which we view our world offer deep insights.

Our conversations will include, Quantum Physics, Alternate Realities, Reincarnation, Parallel Lives, Life Between Lives, Interdimensional Consciousness and more...
